### Profile

---

Enthusiastic and detail-oriented recent graduate with a B.tech in Computer Science, eager to leverage strong programming skills, problem solving abilities, and passion for technology in a challenging developer role. Proven track record of working on diverse projects and the ability to adapt quickly to new technologies in fast-paced environments.

### Skills

---

- React
- Node.js
- Express
- monogoDB
- Html
- Css
- Java Script

### Professional Experience

---

#### Idatalytics

11/2024 – 03/2025

#### Internship

Kochi, India

Full stack development in MERN

### Certificates

---

#### 7-Day Backend Web Development Bootcamp with Node.js

Completed intensive hands-on training in backend development using Node.js, covering RESTful API development and database integration.

#### Full stack Web Development Seminar by Agile Infoz

Attended seminars covering the latest trends in full stack development including front-end frameworks like React and backend technologies.

#### How to Css by Codekaro.in

"How to CSS" is a 5-day bootcamp offered by Codekaro, designed to teach participants the fundamentals of CSS through hands-on projects and real-world applications.

### Education

---

#### Kerala technological university

Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE)

08/2020 – 06/2024 | Thiruvananthapuram, India

## Projects

---

### **Suspicious Activity Detection in Public Places**

*Developed an intelligent surveillance system to automatically detect suspicious activities such as theft, medical emergencies, child abduction, and fire incidents using image processing and machine learning techniques.*

- Utilized Python, OpenCV, and TensorFlow to process video streams in real-time.
- Achieved 90% accuracy in detecting specified events.
- Integrated alert system via SMS for emergencies.

### **Student Attendance Management System**

*Developed a full-stack web application to automate the process of recording and managing student attendance in educational institutions.*

- Built using React, Node.js, Express, and MongoDB for front-end and back-end.
- Implemented role-based access control for teachers and administrators.
- Reduced manual data entry time by 70%.
